

ELMER LEUPEN, NCE film editor

I am a versatile film editor with a passion for art-related projects and 30 years of experience editing films for cinema, television, art installations and operas. I enjoy being involved in the entire post-production process and work a lot independently. I believe in an inspiring working relationship with the director to creatively rise above myself for the benefit of the film. My specialization is making image compositions and creating 2D or 3D content where necessary. I enjoy working on projects about art and science.
